TripIndex is a cost-comparison of a night out in popular cities around the world for summer 2012, taking into account typical costs for two people having a pre-meal cocktail, a meal out, taxis and a night in a hotel.

The destination list comprises key cities from 48 of the 50 countries with the largest number of international tourist arrivals (data compiled by the UNWTO).

Hotel prices shown specify the average per-night cost of a room at four-star hotels found on TripAdvisor (via partner booking sites such as online travel agencies and direct hotel suppliers) in each destination for the summer travel period (June 1 - August 31, 2012).

Dinner prices specify the average cost of a traditional or common two-course meal (appetizer and main course) for two people with a bottle of house white wine (prices averaged from three mid-range restaurants in each destination).

Cocktail prices specify the average cost of two traditional dry martinis from a top-rated five-star hotel on TripAdvisor in each destination.

Taxi prices identify the approximate cost of two taxi journeys of two miles each (representing an evening's return transportation). Data was taken from local authorities, recognized taxi companies and/or travel experts on the area.

TripIndex prices (hotels excluded) were taken in local currencies between March and May 2012 and converted into USD on May 29, 2012. Hotel prices were taken in USD on May 8, 2012.

All prices shown exclude taxes and service fees except for countries where such costs are routinely included in listed prices.
